Assignment 2 - Completion Report

Crumble E-commerce Site: Static, Responsive Pages

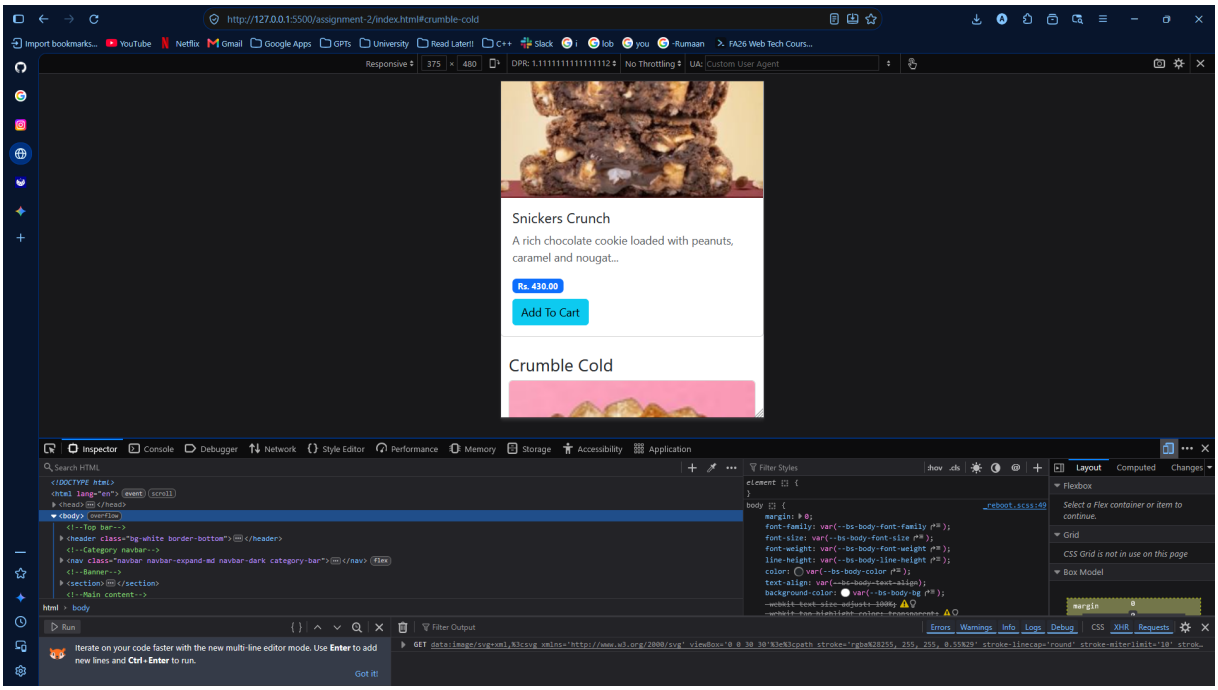

Name: Ayshum
Course: CSC336 Web Technologies
Reference site: Crumble - https://crumblelocal.com/
GitHub: https://github.com/ayshum/csc336-Web-Tech-FA24-BCS-161/tree/main/assignment-2

What is included

Requirement	How it is met
Home page with header, nav bar and cart	index.html has a header with the logo, delivery info, a cart button and a sign in button, plus a Bootstrap category navbar.
Responsive grid of at least 8 product cards	Product cards (image, name, price, Add To Cart button) in a Bootstrap grid: Monthly Drop, Crumble Cold, Cookies and Ice Cream Shakes.
Product detail page	product.html shows the Snickers Crunch cookie with a larger image, name, price, description, quantity selector and Add To Cart button.
Consistent footer	The same footer is used on both pages.
Flexbox / Grid layout	Bootstrap grid classes (row, col) and Flexbox helper classes. No tables and no absolute positioning.
Responsive at phone, tablet and desktop	Layout changes at 375px, 768px and desktop width. See the screenshots on the next pages.
Bootstrap used for real layout work	Bootstrap 5 provides the grid, the collapsing navbar, the cards and the buttons.
No JavaScript	None written. Buttons are not functional yet.

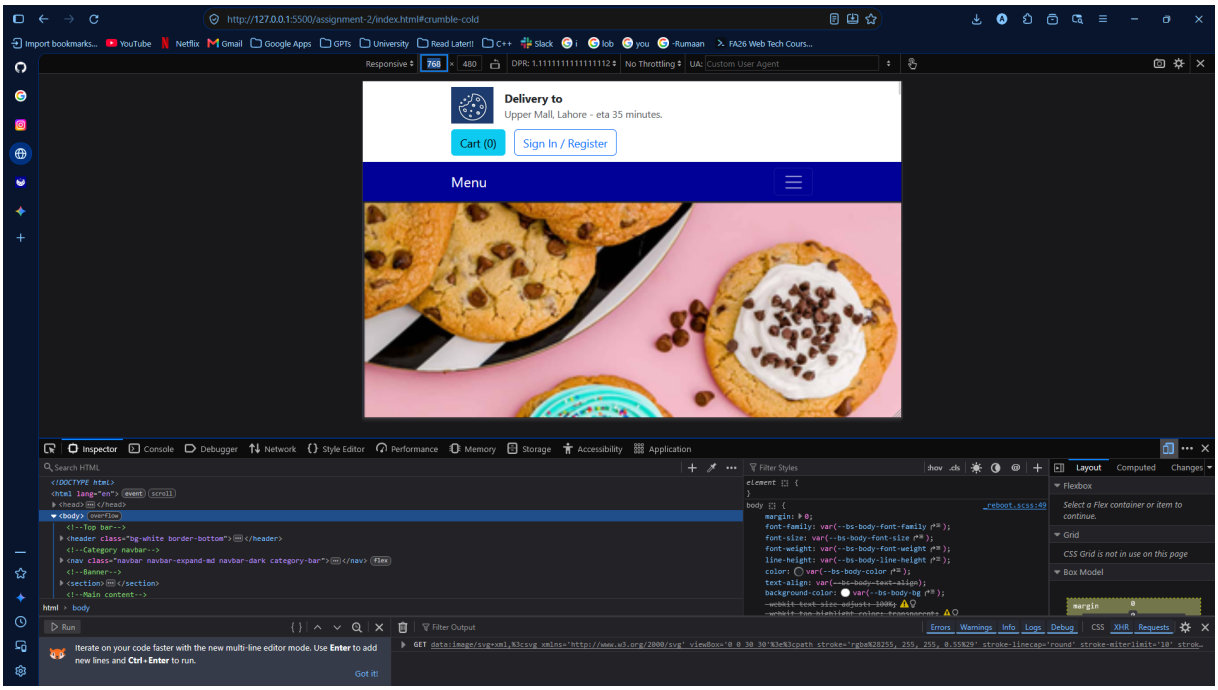

Phone width (375px)

One product card per row, and the navbar collapses into a menu button.

Tablet width (768px)

Two product cards per row, and the navbar links appear in a row.

Desktop width

Four product cards per row.
